

FL956K Wheel Loader Specifications

LOVOL

FL956K Dimensions

Item	Specifications
Rated Load	5500kg
Max. Traction Force	160kN
Max. Gradeability	/
Max. Dump Clearance	3100mm
Dump Reach	1130mm
Wheel Tread	2150mm
Wheelbase	3350mm
Overall Dimension (L×W×H)	8590mm×2980mm×3420mm
Width Over Tyres	2750mm

Engine	
Emission Standard	stage III
Number of Cylinder-Bore/Stroke	6-126°130
Max. Torque	980N·m
Rated Speed	2000rpm
Displacement	9.726L

Transmission System	
Torque Converter	Single stage two phase four element
Modulus of Converter	4.0
Transmission	Planetary powershift
Gear Shift	2 forward, 1 reverse
Max. Speed	/

Front and Rear Axles	
Axles Type	Dry axles
Final Decelerate Type	Planetary reducer, spur cylindrical gear

Tyre	
Tyre Size	23.5-25
Ply	18/16
Front Tyre Pressure	0.38-0.40MPa
Rear Tyre Pressure	0.33-0.35MPa

Steering System	
Type	Three pump flow confluence, hydraulic flow amplification system
Steering Angle Each Direction	37°
Min. Turning Radius	7140mm

Hydraulic System	
Working Pressure	16MPa
Boom Lifting Time	5.6s
Total Cycle Time	9.6s

Brake System	
Service Brake	Gas cap oil clamp pan type
Park Brake	Air-cut brake

Service Refill Capacity	
Fuel Tank	405L
Hydraulic Tank	270L
Engine Oil	22L

LOVOL HEAVY INDUSTRY GROUP CO., LTD.

Address: No. 75, Huanghe East Road, Huangdao District, Qingdao City, Shandong Province, China.

As manufacturer, LOVOL has right to constantly upgrade and improve our products without informing to customers. The pictures in literatures are for reference only, the detailed specifications are subject to real products.

Engine Model	WP10G220E343
Rated Power	162kW
Operating Weight	17460kg
Bucket Capacity	3.3m³
Max. Breakout Force	165kN

FL956K

WHEEL LOADER

PRODUCTIVITY

- The first 5.5T wheel loader of Chinese brand with 3.3m³ bucket which is easier to load, achieves greater fill factors and could retain more materials.
- High-efficiency powertrain system is perfectly matched with hydraulic multi-stage power system that makes machine work fast and efficient.
- LOVOL patented Three Pump Flow confluence technology is adopted. During engine idling, the auxiliary pump works together with the steering pump to provide sufficient flow to make steering light and convenient. When steering is not required, the auxiliary pump works together with working pump to make loading more powerful and efficient.
- Low-effort joystick control system delivers high-efficiency operation with ease and fast.

RELIABILITY

- The K series features many components which leverage product designs that have delivered reliable and durable machines.
- Adopt world class engine which provides excellent service and part availability in market.
- Optimized layout of pipelines and dual-seal technology can avoid oil leakage and make hydraulic system more reliable.

ROBUSTNESS

- Reinforced center-articulated frame which has passed million times fatigue experimental test, 1,000 hours intensive experimental test and 5,000 hours jobsite test, it has been proved to be robust and durable.
- LOVOL Patented gearbox adopts reinforced overrunning clutch which could provide longer service time to the whole transmission system.
- The key components of axles are reinforced which could extend service time of whole axles and makes it more suitable for heavy-duty applications.

COMFORT

- LOVOL ETX (European Technology Excellent) cab adopts skeleton structure which has great vision, solid frame and lower noise features, these could provide a comfortable working environment for operator.
- High-back mechanical suspension seat with headrest could make operators feel more comfortable.
- Ladders with self-cleaning steps are inclined which is easy to climb up and down, wild platform allows the ease of movement from front or rear of machines.

01 Engine

- Standard equipped with WEICHAI WP10G220E343 engine which is specialize for the heavy-dust working environment, it adopts three-stage air filter which can avoid early wearout of engine to extend service life. It also adopts multi-stage fuel filter which is suitable for various fuel to ensure the cleanliness of engine system.

02 Transmission

- Transmission adopts LOVOL patented reinforced overrunning clutch, service life rises 30% with high reliability.
- Key bearings and seals adopt imported premium parts which have higher reliability.

03 Axles

- Axle housing is optimized design through increasing the cross-section, the brace bearing of wheel hub is also reinforced, that make front axles capacity reaches 40T.
- Main reducer and wheel hub are reinforced, the service lives rise 30%.

04 Cab

- Integrated closed skeleton structure cab which has great vision, equipped with air conditioning and high-back mechanical suspension seat, that make operator more comfortable.

05 Frame and Articulation

- New reinforced front and rear frames with patented composite articulated structure went through million times fatigue experimental test, 1,000 hours intensive experimental test and 5,000 working hours jobsite test, reach super strong payload capacity.

06 Hydraulic System

- LOVOL patented Three Pump confluence technology, it includes three pumps with small displacement and small size, but their flow pressures are higher, and more reliable.
- Hydraulic oil filter's filtration ratio is 200 (means 99.5% impurities could be filtered out) that makes hydraulic system cleaner and more reliable.
